Permit History Packet

MISSING

No supported claims supplied.

Reviewed: not supplied

2 of 4 source lanes are validated.

Two warnings remain in the generated packet outline.

The resulting outline.

Exact section text from compose_packet_sections, using the supplied fixture and an evaluation date of 28 October 2026.

Source lane snapshot

2 of 4 source lanes are validated; readiness is review ready.

What the packet can say

Describe source context, reviewed dates, and which lanes support the summary.

What stays uncertain

Keep 2 warning(s) visible instead of turning incomplete lanes into conclusions.

Review focus

Next review pass should focus on: State GIS Context, Town Zoning Reference, Conservation Record Lane.

What this example establishes

The public code carries supplied source states, warning counts and review focus into a report outline. It does not retrieve records, verify their truth or establish live application accuracy.
