

TIM SULLIVAN

AI Solutions Consultant | Applied AI Workflow Systems

Massachusetts | (781) 363-0505 | hello@lastingground.com

Creatio work sample: sulmusic2-star.github.io/creatio-ai-consultant/ | github.com/sulmusic2-star

Summary

Applied AI systems builder and former account manager who turns ambiguous, multi-stakeholder processes into working workflows. Built Lasting Ground, an address-based public-record review product, plus agent, evaluation, MCP, REST and GIS integration systems. Experienced in customer communication, team training, and presenting to groups of 20–50.

Selected experience

LASTING GROUND — Creator / Applied AI Systems Builder April 2026–present

- Analyzed a fragmented property-record process; defined intake, source, normalization, matching, answer, unresolved-work, and release stages, then prioritized use cases by value, feasibility, and error consequence.
- Built the workflow across government REST and ArcGIS sources using Python, FastAPI, Cloudflare, address resolution, agent tools, and human-review gates.
- Translated evidentiary requirements into solution rules: official-source links, checked dates, scoped wording, visible conflicts, and “Not confirmed” when evidence is incomplete.

INDEPENDENT TECHNICAL STUDY & PRODUCT DEVELOPMENT Massachusetts | 2022–present

- Self-directed work in AI-assisted software development, workflow automation, APIs, evaluation, and product prototyping; focused since April 2026 on Lasting Ground and its supporting systems.

UNITED SYSTEMS — Account Manager Braintree, MA | May 2017–June 2020

- Handled customer-facing sales, training, goal setting, interviewing, and feedback across multiple campaigns and operating procedures.
- Delivered presentations twice weekly to groups of 20–50 peers and supported team development through coaching and process training.

ADDITIONAL EXPERIENCE Key Travel Concierge, Runner — Nantucket, MA (May–Sep 2022) · Mentor — Dedham, MA (Sep 2020–Mar 2022) · Buffalo Wild Wings, Guest Experience Captain — Hanover, MA (Mar 2016–Feb 2017)

Public technical proof

Lasting Ground examples: 18 tests at 93% line coverage. Agentic Engineering: eval gate, drift check, Agent Skill, typed MCP tools; 13 tests and 12/12 eval records. GroundTruth-Geo: 33 government-cited items across seven states and deterministic grader. SquadBrain: shipped iOS product; 25 tests at 98.3% line coverage.

Capabilities

Consulting and design: Process discovery · workflow design · use-case prioritization · requirements · value/risk mapping · implementation proposals · success measures · guardrails

AI and delivery: LLMs · agent architecture · MCP · REST APIs · ArcGIS/GIS · Python · FastAPI · TypeScript · Cloudflare · evaluation · human approval

Education and evidence
