An address match is a starting point.

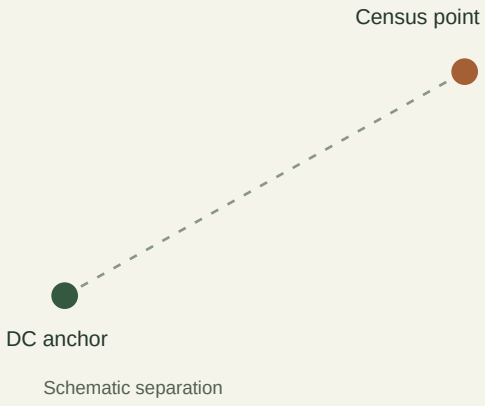
1600 Pennsylvania Ave NW, Washington, DC. This study follows an archived Census address point through its source evidence and a location check. It is not a current building or parcel determination.

Requested address	1600 Pennsylvania Ave NW, Washington, DC
Census match	1600 PENNSYLVANIA AVE NW, WASHINGTON, DC, 20500
Saved Census point	38.89869893252, -77.03518753691
Evidence retrieval	August 20, 2026 at 20:14:12 UTC

163.787 m

between the saved Census point and DC address anchor

The support record was collected on August 21, 2026 and is labeled provisional_currency_review_required. Its official-address anchor is a useful comparison, not final building or parcel verification.



Schematic separation

Why the discrepancy matters

The historic-layer displacement test changed 19 of 57 sampled answers, first at 5 m. These are fixed coordinate-displacement tests, not a measured geocoder-error distribution. The 163.787 m anchor separation lies beyond the tested 100 m radius.

Conclusion: retain point-level results and require location review before making a broader property claim.

Keep the source and the limitation together.

FEMA: exact fields from the saved response

```
OBJECTID   17579832
FLD_AR_ID  110001_321
FLD_ZONE   X
SFHA_TF    F
ZONE_SUBTY AREA OF MINIMAL FLOOD HAZARD
```

At the archived Census point, the FEMA record reports zone X and a false Special Flood Hazard Area flag. The retrieval date does not establish when the map was published or that it remains current.

Open the saved FEMA JSON receipt

Run the original FEMA query (current response may differ)

The other saved queries

NPS: two listed-district polygons intersected the point. One record describes Lafayette Square Historic District as excluding the White House and its grounds. Do not turn the point result into a legal designation of the building.

EPA: zero Superfund or Brownfields records were returned within 0.25 mile. That is a bounded query result, not proof of no contamination or no other environmental records.

Saved NPS evidence

Saved EPA evidence

Location support and its provisional status

Full public displacement-review record

Scope: selected archived records from GroundTruth-Geo. Independent human review remains pending. This study does not measure Lasting Ground production accuracy, establish legal status or replace an official determination.
